Glossary

T2S – Party BIC	BIC of the securities account holder.
Name of Legal Entity	Official name of account holder.
Instructing BIC	You can provide us with another BIC that will be able to input the instructions for the securities account. Our participants use this function to assign another legal entity with a Power of Attorney to instruct on behalf of them.
Description	Free selectable text. This text is shown as securities account description to your securities account. The securities account description should not have more than 60 characters or consisting of umlauts (Ä, Ö, Ü). Special characters such as / . - % can be used. All other special characters can not be processed.
Opening Date	The day starting at which the securities account will be active.
Sec. Acc. Category	<p>Possible securities account categories:</p> <ul style="list-style-type: none"> — No constraints: securities account without constraints — Receives blocked: the securities account is blocked for receipt instructions — Deliveries blocked: the securities account is blocked for delivery instructions — Deliveries and Receives blocked: the securities account is blocked for delivery and receipt instructions — Blocked Special Holding Type: the securities account is blocked, because it is used for holding positions in Individual Custody
Blocking Date from	The day starting at which a block will be active for the securities account.
Blocking Date to	The last day a block will be active for the securities account.
Blocking Reason	Reason of the block valid between the dates specified in the Blocking Date fields.

Default Sec. Account	If the check box is ticked, the securities account is used as the default securities account. As soon as e.g. an instruction is created in the Settlement Client, the system automatically displays this securities account number in the Securities Account field of the screen.
Partial Settlement Default	If the check box is ticked, partial settlement is allowed for all instructions on this securities account. The Partial Settlement Ind. field in the Settlement Client will automatically display the option Partial allowed if an instruction is created for this securities account.
Auto Receive	If the check box is ticked, a receive instruction will be automatically generated for received DPF allegations, unless the instruction involves an external depository.
Hold Claim Cash	If the check box is ticked, claim instructions related to the cash payment will automatically receive status Hold. They can be released directly on the Settlement Client or via SWIFT as soon as the dividend payment has been effected. For details see Settlement Services - Functional Guide.
Hold Claim Securities	If the check box is ticked, claim instructions related to certificates will automatically receive status Hold. They can be released directly on the Settlement Client or via SWIFT as soon as the dividend payment has been effected. For details see Settlement Services - Functional Guide.
Dedicated Cash Account	A central bank money account which is used as cash account for cash leg settlement in T2S and which is linked to a securities account.
Auto Collateralisation	Auto-collateralisation is an intra-day credit in central bank funds to facilitate the processing of RVP instructions in cases of temporarily insufficient liquidity on the DCA (Dedicated Cash Account). The OeNB determines the securities which are admitted as collateral. To use this function the cash-side settings are effected on the part of the OeNB (DCA settings).
DCA – Settlement Default	If you use 2 DCAs for your securities account, you have to define one as the default account for cash settlement.
DCA – Income Default	If you use 2 DCAs for your securities account, you have to define one as the default account for income payment/corporate actions.
