9. Examples

9.1 Fees for Settlement of Instructions (see section 1)

The examples listed are based on the following assumptions:

- Bank X: Securities account holder at OeKB CSD
- Bank Y: Securities account holder at OeKB CSD
- CSD: Securities account holder at OeKB CSD and Custodian of OeKB CSD (OeKB CSD as Investor CSD)
- Security AT123: Security held in OeKB CSD's vault (OeKB CSD as Issuer CSD)
- Security XX123: Security held by OeKB CSD via Custodian CSD (OeKB CSD as Investor CSD)
- Bank A: Securities account holder at CSD

Example 1, transaction type Intra, DVP/RVP

Fee for delivery against payment of security AT123 from Bank X to Bank Y; if in the respective month not more than 8,350 instructions have been settled for either Bank X or Y.

Bank X: 1.85 (1.75 + 0.10) (see section 1.1.1)

Bank Y: 1.85 (1.75 + 0.10) (see section 1.1.1)

Example 2, transaction type Intra, DFP/RFP

Fee for delivery free of payment of security XX123 from Bank X to Bank Y; if in the respective month not more than 8,350 instructions have been settled for either Bank X or Y. The instruction of Bank X was sent in Hold Status. Bank X sends a release instruction before the Intended Settlement Date.

Bank X: 1.75 (see section 1.1.1) + 0.10 (see section 1.1.6)

Bank Y: 1.75 (see section 1.1.1)

Explanation: In case both counterparties are securities account holders of OeKB CSD, a fee of 1.75 is charged even if the security is held with a Custodian.

Example 3, transaction type Intra, DFP/RFP

Fee for delivery free of payment of security XX123 from one securities account of Bank X to another securities account of Bank X

Bank X: 0.85 (see section 1.1.3)

Example 4, transaction type Intra, DVP/RVP

Fee for delivery against payment of security AT123 from Bank X to CSD; with final beneficiary Bank A; if in the respective month not more than 8,350 instructions have been settled for either Bank X or CSD.

Bank X: 1.85 (1.75 + 0.10) (see section 1.1.1)

CSD: 1.85 (1.75 + 0.10) (see section 1.1.1)

Explanation: Also in this case both counterparties are securities account holders with OeKB CSD. It is irrelevant whether there is a final beneficiary behind the counterparty (CSD). Transaction type Intra applies for instructions for the settlement between two securities accounts with OeKB CSD, even if one or both account holders are a CSD.

Example 5, transaction type Cross, DVP

Fee for delivery against payment of security XX123 from Bank X to CSD with final beneficiary Bank A

Fees for Bank X depends on the respective CSD; concrete examples (see section 1.2.1):

- CSD = Euroclear The Netherlands (IT platform T2S): 2.10 (2.00 + 0.10) ← transaction type Cross

Example 6, transaction type External, DFP

Fee for delivery free of payment of security XX123 from Bank X to CSD with a securities account holder in the local market (of security XX123), whereby the final beneficiary is not receiving the security XX123 directly on a securities account held with the Custodian CSD.

Fees for Bank X depends on the respective CSD and the local market; concrete examples (see section 1.2.1, second table):

- CSD = Clearstream Banking Luxembourg, local market = Sweden: 44.00
- CSD = Clearstream Banking Luxembourg, local market = China: 70.00

Example 7, Fee for processing of delay due to lack of Cash/Security

Delivery against payment of security XX123 from Bank X to Bank Y

- Intended Settlement Date is June 05th, 2017
- Instruction from Bank X is done on June 02nd, 2017 in Hold Status
- Instruction from Bank X is done on June 05th, 2017 in Release Status
- Matching of Instructions is done on June 05th, 2017
- Bank X sends a release on June 06th, 2017 for the original instruction.
- On June 06th, 2017 and June 07th, 2017 the transaction cannot be settled due to lack of cash of Bank Y

Fee per day of delay (see section 1.1.8)

Bank X: 1.50 due to Hold Status on June 05th, 2017

Bank X: 3.00 (2*1.50) due to lack of cash on June 06th, 2017 and June 07th, 2017

Example 8

Assumptions:

Number of settled instructions p.m. with counterparty having a securities account with OeKB CSD (examples 1, 2 and 4):

- free of payment: 10,000
- versus payment: 17,000

Calculation:

Fee per (partially) settled instruction for the settlement between two securities accounts of different account holders, which was not issued by a CCP for stock exchange clearing (see section 1.1.1).

Both instructions, free of payment and versus payment are considered to calculate the fee within the sliding scale: a) and b) $10,000 + 17,000 = 27,000$.

From	To	Number (Bank X)	Fee for securities leg per instruction	Aggregated Fee for securities leg
0	8,350	8,350	1.75	14,612.50
8,351	16,650	8,300	1.50	12,450.00
16,651	25,000	8,350	1.25	10,437.50
25,001	33,300	2,000	1.00	2,000.00
33,301		0	0.80	
Total		27,000		39,500.00

17,000 instructions versus payment have been settled (on the securities account held with OeKB CSD):
 $17,000 * 0.1 = 1,700$.

9.2 Administration of Securities Accounts (See section 2)

9.2.1 Volume dependent fees for securities held with OeKB CSD as Issuer CSD (see section 2.2)

Example 10

- Type of security: AK
- Basis amount in EUR (market value in EUR): 37,000,000,000.00
- Type of security: AN
- Basis amount in EUR (nominal value in EUR): 15,000,500,000.00

Calculation:

- Sum of all basis amounts in EUR in the securities group Shares:
 $37,000,000,000.00 + 15,000,500,000.00 = 52,000,500,000.00$
- Result of weighting:
 $(30,000,000,000.00 * 1) + (22,000,500,000.00 * 0.8) = 47,600,400,000.00 / 52,000,500,000.00 = 0.9153$

Weighting

9.2.2 Volume dependent fees for securities held with a foreign custodian of OeKB CSD as Investor CSD (see section 2.3)

Example 11

- Foreign custodian: Clearstream Banking Frankfurt / Creation
- ISIN: AU000000BSGO
- Share
- Issuing country: Australia
- Position: 6,500 Units
- Rate in EUR: 1.64
- Rate and positions remained unchanged during the accounting period

Calculation (see section 2.3.1 and 2.3.3):

$$\begin{aligned} \text{Fee p.a.} &= (\text{market value in EUR}) * (\text{rate CBF category D BP}) / 10000 = \\ &= (6,500 * 1.64) * 11 / 10000 = 11.726 \end{aligned}$$

$$\begin{aligned} \text{Fee p.m.} &= \text{Fee p.a.} / 12 = \\ &= 11.726 / 12 = 0.977 \end{aligned}$$

Example 12

- Foreign custodian: Monte Titoli
- ISIN: IT0003563357
- Bond
- Position: EUR 30,000.00 nominal value
- Position remained unchanged during the accounting period

Calculation (see section 2.3.1):

$$\begin{aligned} \text{Fee p.a.} &= \text{Nominal value} * (\text{rate Monte Titoli (nominal value) BP}) / 10000 = \\ &= 30,000 * 0.83 / 10000 = 2.49 \end{aligned}$$

$$\begin{aligned} \text{Fee p.m.} &= \text{Fee p.a.} / 12 = \\ &= 2.49 / 12 = 0.21 \end{aligned}$$

9.3 Connection to and communication with the IT systems of OeKB CSD (see section 7)

9.3.1 Communication via SWIFT network

Example 13

Account Holder Bank X

- sends 8,000 SWIFT messages to OeKB CSD
- receives 10,000 SWIFT messages from OeKB CSD

Calculation (see section 7.2):

Sum of inbound/outbound SWIFT messages: $8,000 + 10,000 = 18,000$

Fee for messages: $(10,000 * 0.13) + (8,000 * 0.11) = 2,180.00$

Additional monthly fix fee: 270.00
